This volume replaces the 1948 Census of Business Area Bulletins, Series 1–R

PREFACE

This is one of a series of seven volumes presenting final results of the 1948 Census of Business for Retail, Wholesale, and Service Trades. Statistics for Retail Trade are contained in three volumes: Volume I, General Statistics, Part 1; Volume II, General Statistics, Part 2, and Merchandise Line Statistics; and this volume. The Census, which was conducted by personal canvass of business establishments, was taken in accordance with the provisions of the act of June 19, 1948 (62 Stat. 478; 13 U. S. C. 121–123). This act provides for a Census of Business to cover the year 1948 and every fifth year thereafter. Previous Business Censuses covered the years 1929, 1933, 1935, and 1939.

Important to the conduct of the 1948 Census of Business were the assistance of many private and public organizations in the planning phase of the Census and the excellent cooperation of some 3,000,000 business establishments in supplying the information required, as well as the work of the several thousand Census employees who participated in the field enumeration, editing, tabulation, and other Census operations.

The advice of trade associations, individual businessmen, research and marketing organizations, and government agencies was invaluable in determining the feasibility of collecting various types of data and the methods for minimizing the burden of reporting, as well as in determining the types of information which would be of greatest value. Because of budgetary and other limitations, it was not possible to collect all of the data recommended by these groups. Timely publicity given to the Business Census by business organizations, trade papers, local newspapers, and radio stations aided greatly in informing businessmen of the nature and objectives of the Census and facilitated the collection of Census reports.

The primary responsibility for the 1948 Census of Business was centered in the Business Division of the Census Bureau. Other Divisions of the Bureau, particularly the Field Division and the Machine Tabulation Division, also had important functions in the Census.

The Business Census was taken under the supervision of William C. Truppner, Chief of the Business Division. Major contributions to the planning of the 1948 Census of Business were made by William A. Ruff, Assistant Chief, who retired January 1, 1948, and Earl D. Krickbaum, Chief of the Procedures and Processing Section until November 1, 1948.

The following personnel in the Business Division had important responsibilities in the Census:

Harvey Kailin was Assistant Chief in Charge of Program. Louis Greenberg was responsible for review of all text material and table forms, and assisted on publication problems.

Max A. Bershad was Chief of the Statistical Methods Section. Henry Wulff, in charge of Quality Control, worked on field enumerating techniques, and office editing and tabulating procedures. Aaron Sabghir, in charge of Sampling Techniques, worked on the post-enumeration survey and measures of Census coverage and accuracy.

Ernest J. Engquist, Jr., was Chief of the Retail Trade Section and James O. Reid was Assistant Chief. Maurice Haven, James W. Turbitt, John W. Field, Victor O. McNabb and Jane E. McCullough, participated in the planning and developing of report forms, publication plans, and manuals, the writing of texts, and the handling of technical problems arising during the processing of reports and tabulations.

M. D. Bingham was Chief of the Procedures and Processing Section, and L. Parker Temple was Assistant Chief. Richard S. McCurdy, succeeded by R. M. Micoly in July 1949, and assisted by Jervis Braunstein, was in charge of the Directory Subsection, responsible for receiving report forms and the handling of special problems connected with multiunit firms. Percival Ableman, succeeded by R. M. Micoly in March 1950, was Chief of the Retail Trade Processing Subsection, and was in charge of editing, coding, and tabulating Retail Trade reports. J. Stanley Werking participated in the design of forms and all problems of printing and preparation of material for publication.

In the Field Division, Jack B. Robertson, assisted by Arthur Cook, directed the field work for the Census of Business. Lancelot W. Armstrong, Machine Tabulation Division, assisted by Martha Ayres, was responsible for Machine Tabulation techniques and procedures; and Franklin L. Thatcher and Robert H. Brooks, Administrative Services Division, were responsible for the printing and publishing of the Census of Business.

MAY 1951.

OTHER 1948 CENSUS OF BUSINESS VOLUMES*

Volume I: RETAIL TRADE—GENERAL STATISTICS, PART I

Chapter
1. United States Summary.
2. Sales Size.
3. Single and Multiunits.
4. Employee Size.
5. City Size.
6. Legal Form of Organization.
7. Warehouses, Other Auxiliary Units.
8. Miscellaneous.
9. Territories and Possessions.

Volume II: RETAIL TRADE—GENERAL STATISTICS, PART 2, AND MERCHANDISE LINE SALES STATISTICS

Chapter
10. Merchandise Inventories.
11. Credit Sales.
12. Selected Types of Operation.
13. Employment and Pay Roll Analysis.
14. Trucks.
15. Miscellaneous.
16. Merchandise Line Sales—Food Group.
17. Merchandise Line Sales—Eating and Drinking Places.
18. Merchandise Line Sales—General Merchandise Group, General Stores.
19. Merchandise Line Sales—Apparel Group.
20. Merchandise Line Sales—Furniture, Furnishings, Appliance Group.
21. Merchandise Line Sales—Automotive Group and Gasoline Service Stations.
22. Merchandise Line Sales—Lumber, Building, Hardware Group.
23. Merchandise Line Sales—Drug and Proprietary Stores.
24. Merchandise Line Sales—Miscellaneous Kinds of Business.

Volume IV: WHOLESALE TRADE—GENERAL STATISTICS AND COMMODITY LINE SALES STATISTICS

Chapter
1. United States Summary.
2. Sales Size and Operating Expenses.
3. Credit.
4. Sales by Class of Customer.
5. Legal Form of Organization.
6. Employee Size.
7. Trucks.
8. Miscellaneous General Statistics.
9. Territories and Possessions.
10. Commodity Line Sales—United States Summary.
11. Commodity Line Sales—Merchant Wholesalers—Geographic Divisions.
12. Commodity Line Sales—Manufacturers' Sales Branches (With Stocks)—Geographic Divisions.
13. Commodity Line Sales—Assemblers (Mainly Farm Products)—Geographic Divisions.
14. Petroleum Bulk Stations and Terminals.

Volume V: WHOLESALE TRADE—AREA STATISTICS

United States Summary
Area Statistics—Consists of 50 Chapters: One for Each State, One Chapter for the District of Columbia, and One Chapter for Territories (Alaska and Hawaii).

Volume VI: SERVICE TRADE—GENERAL STATISTICS

Chapter
1. United States Summary.
2. Receipts Size.
3. Employee Size.
4. City Size.
5. Legal Form of Organization.
6. Trucks.
7. City Statistics.
8. Laundries, Cleaning and Dyeing Plants, and Related Services.
9. Amusements.
10. Hotels.
11. Tourist Courts.
12. Automobile Repair Services and Garages.
13. Miscellaneous.
14. Territories.

Volume VII: SERVICE TRADE—AREA STATISTICS

United States Summary.
Area Statistics—Consists of 50 Chapters: One for Each State, One Chapter for the District of Columbia, and One Chapter for Territories (Alaska and Hawaii).

*See Appendix E for a list of tables included in each chapter.

CONTENTS

[Arabic page numbers in this report are keyed to chapter numbers by a decimal system. Thus, page 0.17 is page 17 in chapter 0 (United States Summary); page 12.15 is page 15 in chapter 12 (Illinois); etc. The first page of each chapter contains a detailed table of contents for that chapter.]

INTRODUCTION

Scope of the Census, and Area Covered.—The 1948 Census of Business covers Retail, Wholesale, and Service Trades. Retail and Wholesale Trades in the Business Census correspond with minor exceptions to these trade divisions as described in the Standard Industrial Classification Manual, issued May 1949, under the sponsorship of the Bureau of the Budget, Executive Office of the President. For a discussion of the Census scope of Service Trade, see Introduction to Volume VI: Service Trade—General Statistics. All previous Business Censuses covered Retail and Wholesale Trades; Service Trades were first enumerated in the 1933 Census.

The 1948 Census of Business includes business establishments located in Continental United States and the Territories of Alaska and Hawaii. Data for Puerto Rico, obtained in a Census of Business for 1949, are published separately. The 1939 Business Census covered the same areas as the 1948 Census, and, in addition, Puerto Rico. All earlier Business Censuses were conducted only in Continental United States.

Period Covered by the Census.—The 1948 Census of Business is basically a report of business activity in the calendar year 1948. However, the relatively small proportion of establishments which maintained their records on a fiscal year basis and were unable to report on a calendar year basis, were permitted to use a fiscal year ending between September 30, 1948, and March 31, 1949. In a very few cases, reports were accepted for fiscal years not falling within this range. Regardless of the fiscal year used, all establishments were required to report employment and pay roll (except annual pay roll) for the pay periods specified on the report forms.

Method of Canvass.—The 1948 Census of Business was conducted primarily by means of field enumeration, although advance inquiries were made by mail to clarify the reporting problems of large multiunit organizations. For purposes of enumeration, 308 Census field offices were established with jurisdiction over the some 37,000 enumeration districts into which the Nation had been divided. Trained enumerators were assigned areas consisting of one or more enumeration districts. A more complete description of enumeration procedures, including controls on and measures of the coverage of business establishments, are contained in the 1948 Census of Business Volume I, Retail Trade; Volume IV, Wholesale Trade; and Volume VI, Service Trade.

Definition of Retail Trade.—Retail Trade, as defined in the 1948 Census of Business, includes establishments primarily engaged in selling merchandise for personal, household, or farm consumption. Other important characteristics of a Retail Trade establishment are: It is a recognizable place of business and is engaged in activities to attract the general public to buy; it buys or receives merchandise as well as sells; it renders services or processes only incidental to selling; it is considered retail by the trade. Not all characteristics need be present and some are modified by trade practice. Excluded from Retail Trade are peddlers and itinerant vendors without an established place of business. Also excluded are places of business operated by institutions and open only to their own members or personnel, such as restaurants and bars operated by country clubs, school cafeterias, cafeterias operated by industrial plants for their employees, and establishments operated by agencies of the Federal Government on military posts, at hospitals, etc. State and municipally operated liquor stores are included in the scope of Retail Trade.

Establishment Basis of the Census, and Kind-of-Business Classification.—Census of Business figures represent a summary of reports for individual "establishments" rather than for the combined activities of "companies." A separate report was obtained for each location at which business was conducted, including each location of multiunit organizations. For such organizations a separate report also was obtained for each central warehouse, administrative and district office, and each other location (other than a manufacturing plant) which serviced, or was auxiliary to, establishments of the organization reported to the Business Census. Each report was tabulated in accordance with the physical location of the establishment. In addition to being classified on the basis of location, the report for each establishment was assigned a kind-of-business classification on the basis of the primary activity of the establishment during the Census year. The kind-of-business classification of each warehouse, administrative office, and auxiliary unit is based on the classification of the stores in the parent organization which it services or to which it is an auxiliary. A limited number of changes in definitions for individual kinds of business have been made between 1939 and 1948. These changes are described in the section on kind-of-business classifications shown in Appendix A. Appendix B summarizes the comparisons between the 1948 classifications and the corresponding 1939 and 1929 classifications.

Comparison of Census and Standard Industrial Classification (SIC) Kind-of-Business Classification.—The scope of Retail Trade as defined in the Standard Industrial Classification, agrees, in general, with the scope of Retail Trade in the 1948 Census of Business. The three exceptions are in the handling of mail-order houses, bakeries, and antique stores. These cases are as follows:

Although the scope of SIC group 53, "General Merchandise," is identical with the scope of the Census

groups, "General Merchandise Group" and "General Stores," the SIC provides for a separate kind-of-business classification "Mail-order houses, general merchandise." In the Census these establishments were included in "Department stores" or "Dry goods, general merchandise stores," depending upon the lines of merchandise sold and the size of the establishment.

The Census classification "Bakeries, with baking on the premises," differs from the SIC classification "Retail bakeries-manufacturing" in that the Business Census does not include units of multiunit bakeries which bake on the premises. Such units were included in the 1947 Census of Manufactures.

In SIC, the classification "Antique stores" is included as one of the kinds of business in Major Group 59, "Miscellaneous Retail Stores." For Census purposes, this kind of business is included in Major Group 57, "Furniture, Home Furnishings, and Equipment."

Report forms.—Two report forms were used for enumerating establishments classified as Retail. These were Forms BC–21 (the long form) and BC–20 (the short form). Form BC–21 was completed by all stores which had 1948 sales of $100,000 or more, stores of multiunit organizations, and stores with retail leased departments. One in ten of all other retail stores were also required to complete a BC–21. The remainder reported on Form BC–20.

In addition, a Form BC–10 was required for each administrative office, warehouse, and other auxiliary unit of organizations primarily performing functions for the retail stores within their own organization. Reproductions of Forms BC–20, BC–21, and BC–10 are shown in Appendix D. The data in this volume were compiled from those inquiries which are common to Forms BC–20 and BC–21, and also from Form BC–10.

Statistics for Retail Trade.—The statistics contained in this volume have been published previously in a series of Retail Trade Area Bulletins consisting of a separate Bulletin for each State and the District of Columbia, combined Retail-Wholesale-Service Bulletins for the Territories of Alaska and Hawaii, and a United States Summary Bulletin.

The patterns for presentation of data by kind of business in the tables in this volume have been determined in accordance with the number of stores in the areas to which the data shown relate. Because of the relationship between number of stores and number of different kinds of business for which data can be presented, the use of four different patterns, shown in the tables below, was found feasible for cities and counties (table 104 and table 105). In the case of States and standard metropolitan areas (table 101 and table 102), there generally were a sufficient number of stores to make use of the most detailed kind-of-business classification appropriate. Because table 103 includes data for cities with as few as 2,500 inhabitants, only classification by major kind-of-business group is used.

The detail, by kind of business, shown for any area also is affected by the provisions of Census law designed to prevent disclosure of confidential information. Wherever disclosure of figures for an individual store might otherwise result, all data for the kind of business, except "Number of establishments," were suppressed. To prevent derivation of the suppressed figures by subtraction, it always was necessary that data for another kind of business in the same table also be withheld.

Information on a number of additional subjects is presented in other Census of Business volumes. Contents of these volumes is described in Appendix E.

Rules for Presentation of Maximum Kind-of-Business Detail for Counties and Cities

Size of area, based on number of retail stores	Maximum number of kinds of business for which data are presented	Number of areas for which data are presented		Size of area, based on number of retail stores	Maximum number of kinds of business for which data are presented	Number of areas for which data are presented	
		Counties	Cities			Counties	Cities
5,000 stores or more	89	45	22	200–499 stores	17	1,079	637
1,000–4,999 stores	58	237	125	Less than 200 stores	*10	1,369	2,969
500–999 stores	29	341	186				

*Group totals only.

Standard Metropolitan Areas.—In addition to States, counties, and cities, Census of Business statistics are presented for standard metropolitan areas. These are areas which have been defined and established cooperatively by a number of interested Federal agencies under the direction of the Bureau of the Budget for purposes of compilation and presentation of a wide variety of statistical data on a uniform area basis.

The general concept adopted in defining a standard metropolitan area was one of an integrated economic unit with a large volume of daily travel and communication between a central city and the outlying parts of the area. This resulted in an area considerably more restricted, especially for the larger cities, than the "market" or "trading" area. Each area (except in New England) consists of one or more entire counties. In New England, metropolitan areas have been defined on a town rather than on a county basis. A complete statement of the principles adopted as a guide in applying this general concept to the definition of individual areas will be

found in a document issued by the Bureau of the Budget, Executive Office of the President, dated July 28, 1950, entitled "Standard Metropolitan Area Definitions."

The 147 standard metropolitan areas for which 1948 Census of Business data are included in the Area Statistics Volumes are those defined by the Bureau of the Budget as of June 5, 1950, on the basis of 1950 population statistics available at that time. Subsequent to the preparation of Census of Business tabulations, the list of metropolitan areas was increased to 168 areas. The list of 147 standard metropolitan areas included in the Census of Business and the description of the territory which they cover will be found on page 0.53. These areas are also shown on the map on page XIV.

Cities of 2,500 Inhabitants or More.—The cities included in table 103 "Counties and Cities With 2,500 Inhabitants or More" were based on unofficial population figures and will differ slightly from the list as determined by the final 1950 Census of Population, which was not available in time for use for 1948 Census of Business purposes. Some cities which had 2,500 inhabitants or more were not included in the above tables, while a few which had less than 2,500 inhabitants have been included. A review of official preliminary 1950 population figures, available at the time of publication of this volume, permitted preparation of a list of those cities of 2,500 inhabitants or more which were not included in the tables. Appendix C lists these cities.

EXPLANATION OF TERMS

Establishments.—Establishments consists of all retail stores as well as central warehouses, administrative offices, and other units of multiunit organizations which service or are auxiliary to retail stores of the organization. The count represents number of establishments in business at end of 1948.

Warehouses, administrative offices, and auxiliary units.—These are locations of a multiunit organization which service or are auxiliary to the retail stores within the organization. They do not ordinarily sell merchandise at retail. In the Retail Trade tables, they are classified into the following two groups:

Warehouses.—Warehouses include those locations of a multiunit organization primarily engaged in distributing merchandise to retail stores within their own organization. Establishments having auxiliary functions in addition to their warehousing activities are classified as warehouses.

Administrative offices and other auxiliary units.—These include locations such as district offices, garages, etc., primarily engaged in performing administrative or other auxiliary functions, other than warehousing, for the retail stores within their own organization.

Stores.—Stores are separate places of business primarily engaged in selling merchandise at retail. In addition to ordinary retail stores such as grocery and hardware stores, this classification includes eating and drinking places, milk dealers, gasoline service stations, market stands (except farmers' stands), lumber and coal yards, mail-order houses, direct selling (house-to-house) establishments, and establishments selling through coin-operated vending machines. Only business establishments obtaining their primary source of receipts from retail sales of merchandise are classified as retail.

Data for retail leased departments located in retail stores are combined with data for the store in which located and are not reported or counted as separate stores. Retail leased departments not located in retail stores, however, are reported and tabulated as separate retail stores. Retail Trade tables exclude "service" leased departments, such as watch repair, beauty shop, shoe repair, and other leased departments deriving a major source of receipts from services to customers rather than from sale of merchandise.

Although the 1948 Census of Business enumerated all retail stores regardless of size, tabulations exclude data for stores which operated during the entire year 1948 but had sales of less than $500. In 1939, the corresponding figure for exclusion from the tabulations was $100.

Sales.—Sales includes total receipts from customers during 1948, after deduction of refunds or allowances for merchandise returned by customers. Sales include receipts from repairs and from other services to customers but exclude amounts not received from customers, such as income from investments, rental of real estate, etc. They do not include the amount of local and State sales taxes or Federal excise taxes which are collected by the store directly from customers, and paid directly by the store to a local, State, or Federal taxing agency. Gasoline, liquor, tobacco, and other excise taxes which are paid by the manufacturer or wholesaler and passed along to the retailer are included.

The sales figures therefore represent total sales and receipts of all establishments primarily engaged in Retail Trade. They do not include sales at retail accounted for by manufacturers, wholesalers, service establishments, and other businesses whose primary activity is other than Retail Trade.

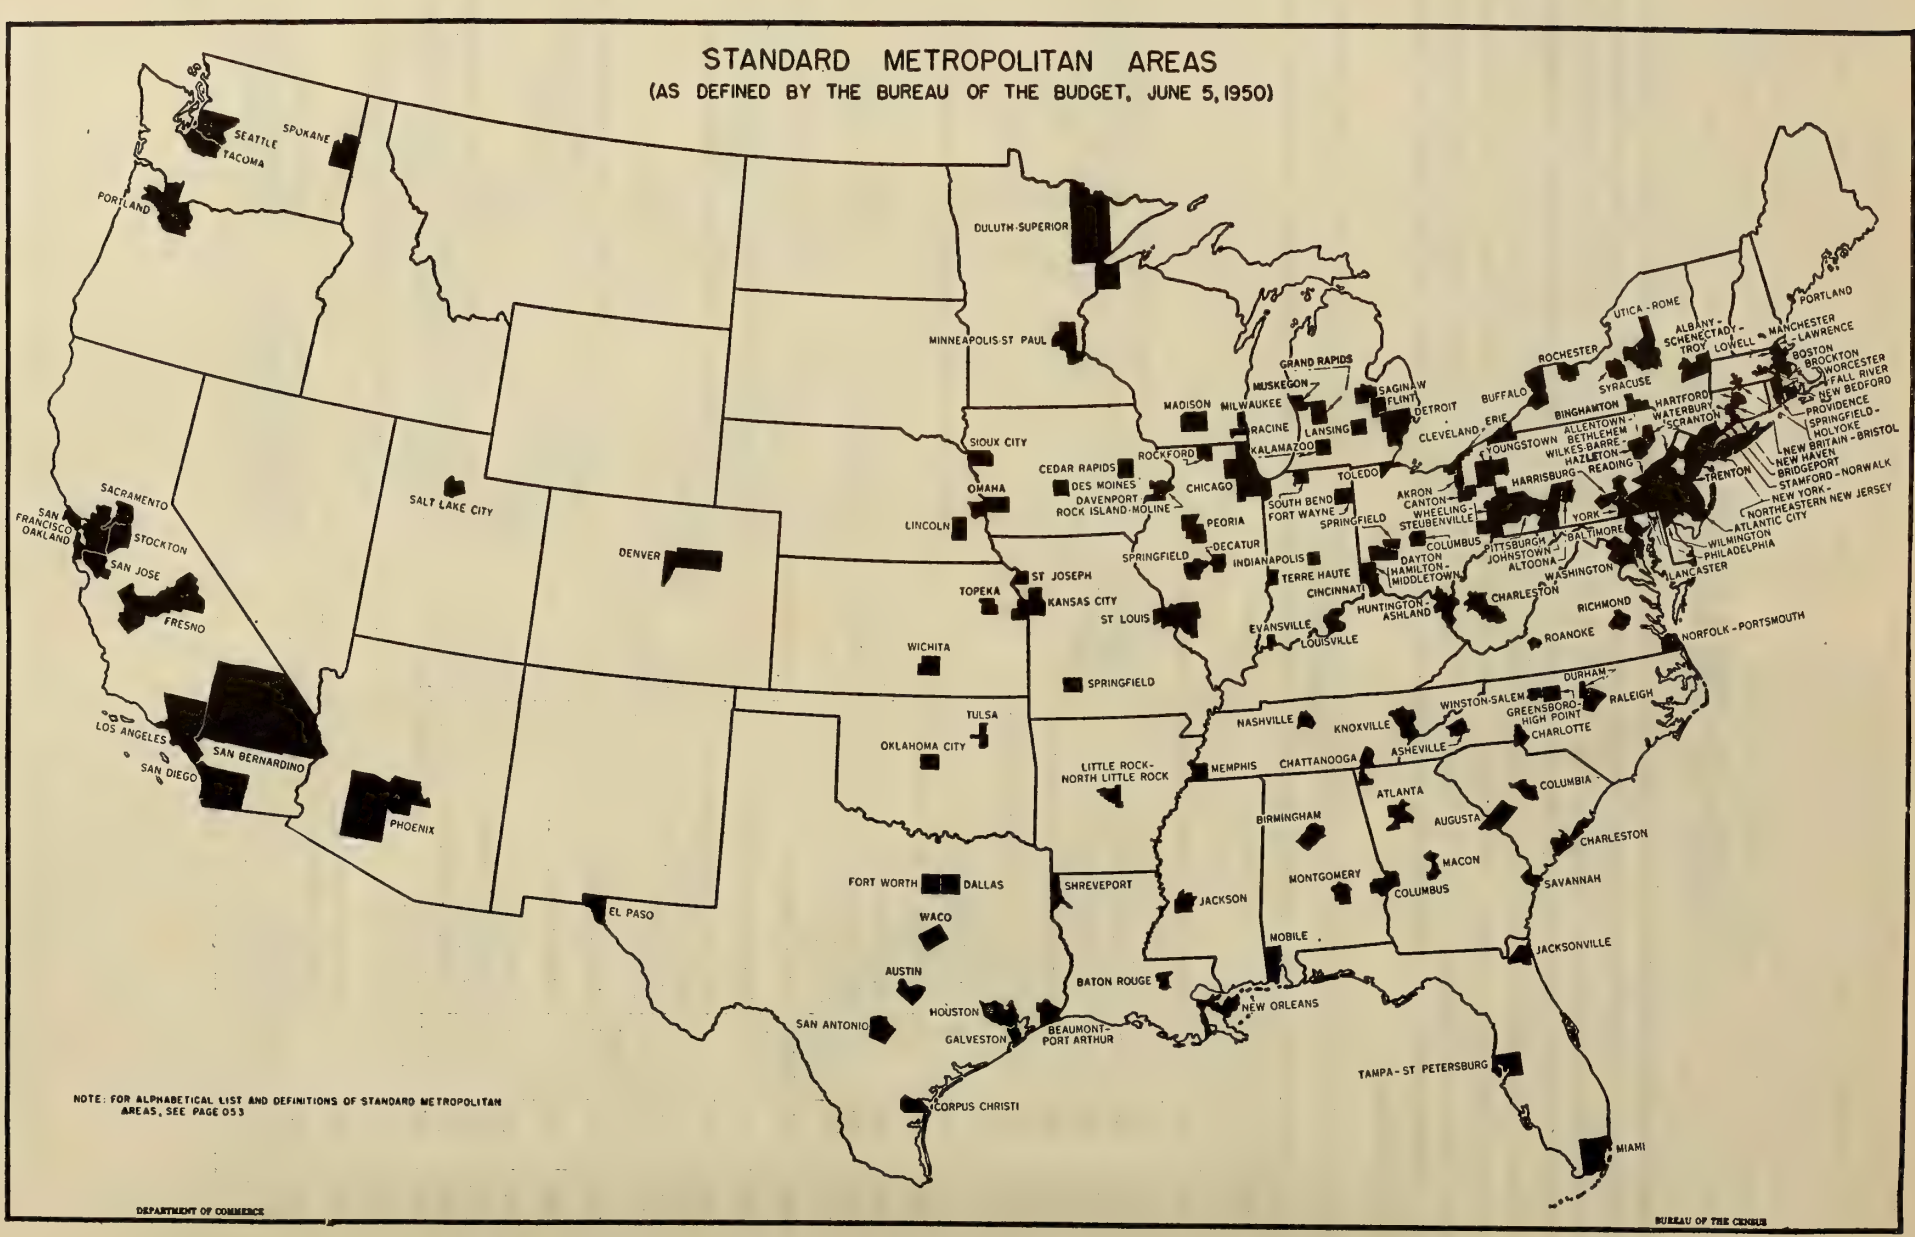
Pay roll.—Pay roll includes all compensations (salaries, wages, commissions, and bonuses) paid during the year to all employees. For corporations, it includes amounts paid to officers and executives; it does not include compensation for proprietors or firm members of unincorporated businesses. Excluded from pay roll are the value of payments in kind, such as free meals, lodgings, etc., or amounts received by employees as tips, etc. Pay roll is reported before deductions for Social Security, income-tax withholding, insurance dues, etc.

Active proprietors of unincorporated businesses.—Ac-

tive proprietors includes owners or partners of unincorporated businesses who devoted the major portion of their time to operation of the business during November 1948.

Unpaid family workers of unincorporated businesses.—Unpaid family workers consists of the number of family members (wives, sons, daughters, etc.) who worked in the business during November 1948, but were not paid a wage or salary. Family workers paid a wage or salary are included in the count of employees and their compensation included in pay roll.

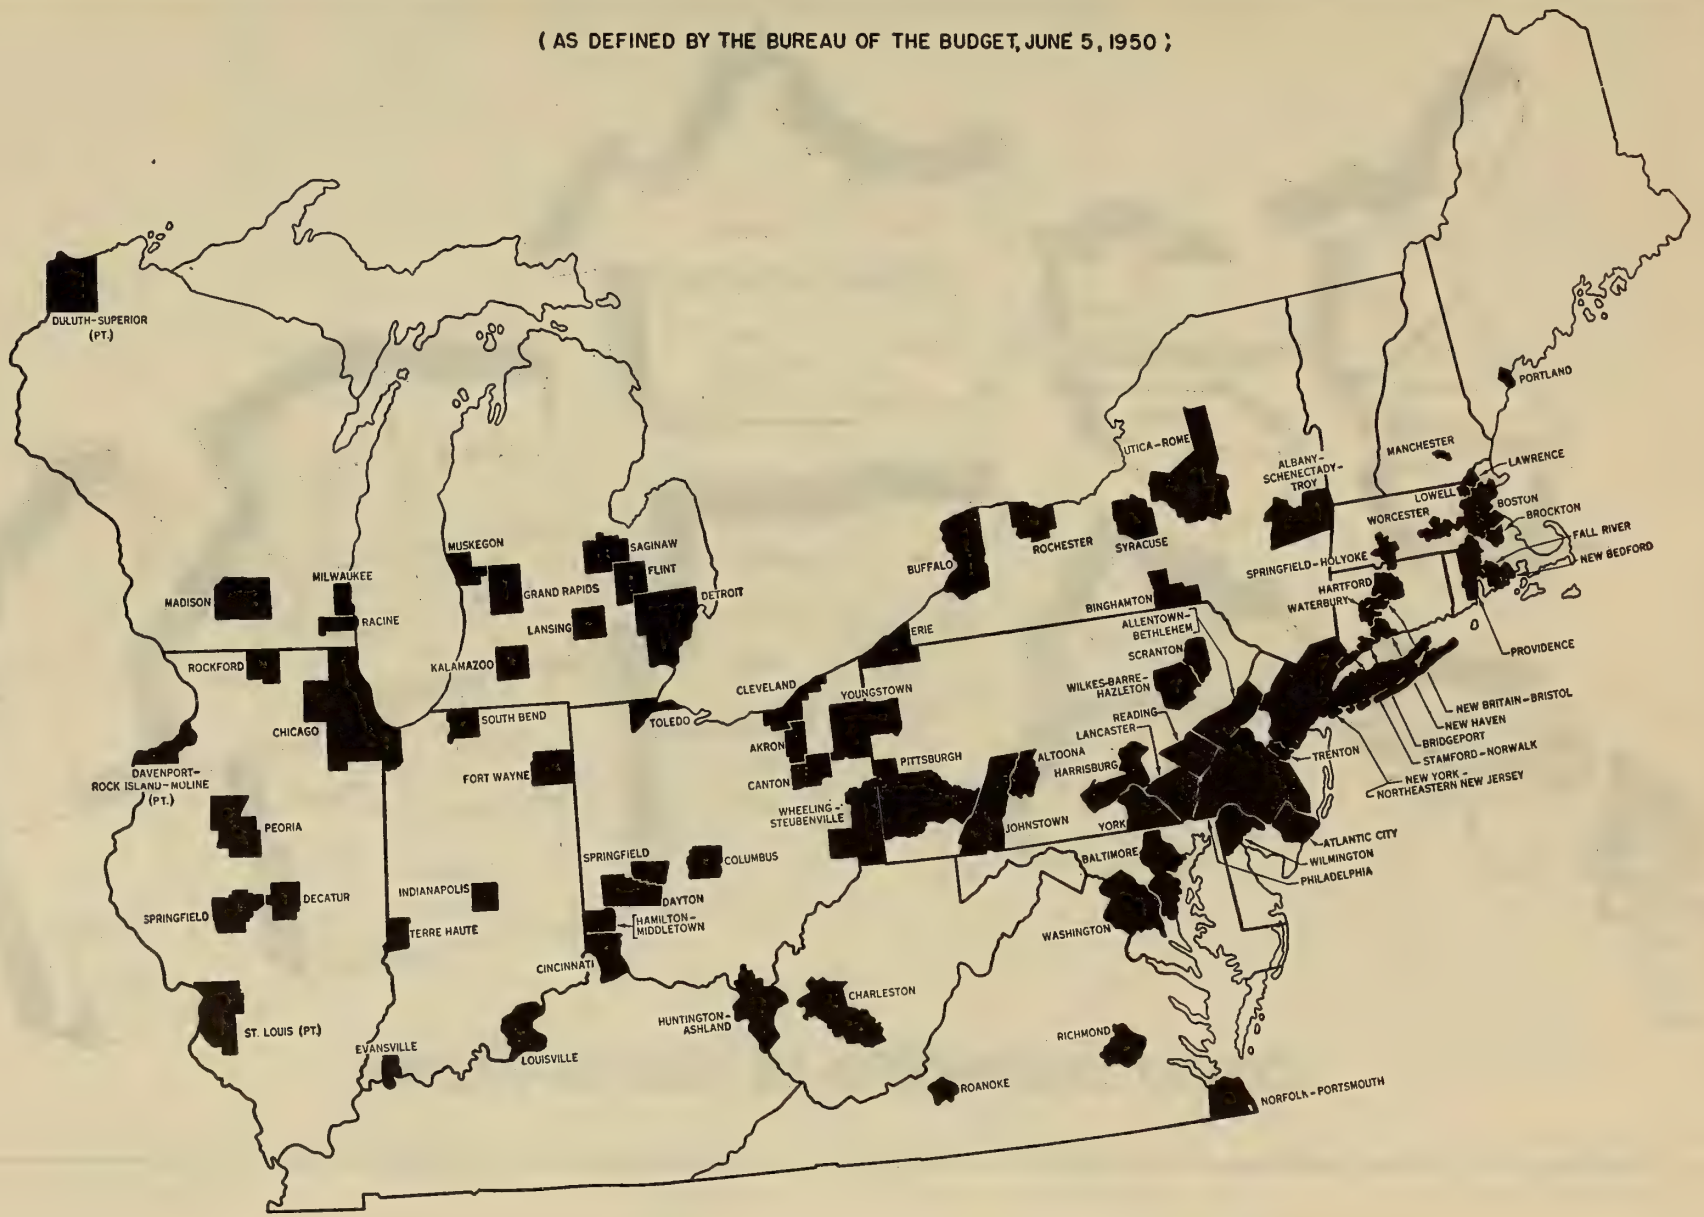
Paid employees.—Paid employees consists of the number of employees, including salaried officers and executives of corporations, who were on the pay roll for a specified workweek. Data for the workweek ended nearest November 15 are included in the Retail Trade tables.



"Full workweek employees."—"Full workweek employees" includes employees, whether regular or seasonal, who, for a specified pay period, were paid for working at least the number of hours typically worked in a week by employees of the reporting establishment. All other employees paid during that workweek were reported as part-workweek employees.

LIST OF CORRECTIONS

This volume has been prepared primarily by assembling and binding the statistical portions of previously issued Area Bulletins for the United States, States, the District of Columbia, and Territories. This publication plan was adopted to conserve public funds and expedite the issuance of the volume. The corrections appearing below represent changes which would ordinarily have been made if the volume had been prepared by reprinting the contents of all Bulletins. It was found desirable to reprint completely the following Bulletins for volume publication: United States Summary, Arizona, Illinois, Louisiana, Mississippi, Missouri, New Hampshire, New Jersey, North Carolina, Rhode Island, Texas, Alaska, and Hawaii. In these cases, some figures will differ from those shown in the Bulletins as originally issued. Differences of 1 in totals for the same item appearing in different tables have not been listed where they are caused by rounding.



[To find line number referred to, count every line in the stub, whether or not numbers appear opposite the line. To find column numbers referred to, count each column in which numerical data appear]

n.a. Not available or not applicable.

[1] Central cities are those named in the title of the metropolitan area, with the exception of New York-Northeastern New Jersey which includes New York, Newark, and Jersey City.

[2] Based on advance 1950 population estimates.

[3] Per capita sales is ratio of 1948 sales to advance 1950 population estimates.

[4] Not included in the ranking of metropolitan areas by the 1950 Census of Population.

Table 1J.—RETAIL STORES: 1948 AND 1939—CITIES WITH 25,000 INHABITANTS OR MORE, RANKED BY 1948 SALES VOLUME

SALES, STORES, AND POPULATION

City	Sales, entire year: Rank		Sales, entire year: Amount (Thousand dollars)		Stores (Number)		Population		Per capita sales[3] (Dollars)

n.a. Not available or not applicable.

[1] Rankings are not identical with those shown in the 1939 Census of Business because this table is not based on the same list of cities used in 1939.

[2] Based on advance 1950 population estimates.

[3] Per capita sales is ratio of sales to population in nearest census year.

[4] Classified as urban under special rule.

Table 1.K.—RETAIL STORES: 1948 AND 1939—CITIES WITH 10,000 TO 24,999 INHABITANTS

SALES, STORES, AND POPULATION

City	Sales, entire year (Thousand dollars)		Stores (Number)		Population		Per capita sales[1] (Dollars)		City	Sales, entire year (Thousand dollars)		Stores (Number)		Population		Per capita sales[1] (Dollars)
